set**

ITNS Transplant IQ Series

The ITNS Transplant IQ Series was developed as a "Transplant Certification Review Course In A Box." Those new to transplant or those needing a comprehensive overview will also benefit from watching this series. In light of economic hardships and educational travel budgets being cut, the DVD set provides a cost effective option for nurses to study for certification exams and continue their education. While individuals can purchase the DVDs as a set or by specific topic, hospitals and transplant centers will find the ITNS Transplant IQ Series to be a tremendous resource for training large numbers of nurses at a low rate per person. Individual viewers will receive CE and CEPTC credits by taking the IQ post-test included in the supplemental materials provided with each DVD and paying a \$10 fee per person, per topic.

All 16 topic areas covered in the ITNS Certification Review Course are provided in the ITNS Transplant IQ Series. The DVDs allow for audience/leader interaction and are studio-produced for the exclusive purpose of delivering information to participants in any setting. The ITNS Core Curriculum Book can also be purchased with the ITNS IQ Series as a complementary learning tool to study for the certification exams.

An application for CE/CEPTC nursing credits has been submitted to the Ohio Nurses Association and the American Board of Transplant Certification. Nurses may call to inquire about contact hours. Please call the ITNS office at +1 412-343-4867 for information.

This DVD series is made made possible through a grant from Astellas Pharma US.
