WHAT IS ITNS?

Founded in 1992, the International Transplant Nurses Society (ITNS) is a nonprofit organization committed to promoting the education and clinical practice excellence of nurses who are interested in and participate in the care of solid organ transplant patients.

ITNS is the first nursing organization to focus on the professional growth and development of the transplant clinician. ITNS provides nurses skilled in transplantation with many opportunities to share their expertise with national and international peers and to receive recognition for their knowledge and scholarly pursuits.

MISSION

As the professional community of transplant nurses, ITNS provides relevant, evidence-based education, research, and advocacy to assure excellence in patient care worldwide.
